What is
Vincandroid?

zuragon®

Engineering excellence is our motto

Zuragon was founded by a team committed to a disruptive change of the way the industry works with development and test systems for Autonomous Driving (AD) and Advanced driver assistance systems (ADAS). By introducing a consistent family of products reutilizing the power of multi-OS design, ADAS knowledge and open source computer vision technology, hand in hand with established standard technologies, Zuragon can offer a suite of products that assists in ADAS development from concept to code on the road.

vicandroid

Get your data up to the cloud in real-time with just a simple Android powered tablet or phone while testing the vehicle on the road.

Vicandroid is an application running on Android platform. It is used as a supplementary product of Vicando. You can use it as a remote logger and record all the data while testing your vehicle on the road and have all the log uploaded to your cloud (e.g. FTP server). Later on the logs can be imported into Vicando. Read more in the manual.
