What is
Vicansim?

zuragon[®]

Engineering excellence is our motto

Zuragon was founded by a team committed to a disruptive change of the way the industry works with development and test systems for Autonomous Driving (AD) and Advanced driver assistance systems (ADAS). By introducing a consistent family of products reutilizing the power of multi-OS design, ADAS knowledge and open source computer vision technology, hand in hand with established standard technologies, Zuragon can offer a suite of products that assists in ADAS development from concept to code on the road.

Get your application on the road faster than ever with less hassle using Vicansim middleware and simulation tool suite.

Vicansim is **Vicando** + OpenCV or MatLab/Simulink™ options. **Vicansim** allows you to detect lanes or vehicles on the road using the OpenCV library and also gives you the chance to interface MatLab/Simulink™.
